Top of fender indentation

Bottom of fender indentation

**Basic Instructions:**
Print this template using a borderless printer and using the borderless option (as printed it is the right side; flip it over, or print a mirror image on a second page for the left side).

Cut out the emblems on the dotted lines (enlarge them if need be for badge placement).

Using painter's tape, stick this template to the fender using the arrows as your guide.

Using your preferred stick-on method (badge tape, emblem glue, etc.), place the badges onto the fender in their proper positions, using the cutouts as your guide.

You may, of course, use the supplied measurements instead of the template.
